

MATERIALS

NON-WOVEN MATT WALLPAPER 37€/m2

non-woven matt wallpaper (155 grams/m2) is a dimensionally stable product that is most commonly used for the commercial digital wallpaper market. The base is made out of a fabric-like material made from long fibers, bonded together by a heat treatment. This process creates a mesh that bonds the wood fibers tightly together making the product extremely durable. In comparison with the non-woven embossed wallpaper, which is similar in appearance, the non-woven matt version is made without textured embossing and an additional protective varnish (heavy metal free) is added for extra washability and scrub resistance.

A list of attributes:

- A lightweight and easy to handle product.
- Noticeably stronger than standard wallpaper.
- Dimensionally stable without stretching or shrinking.
- Can be removed in a dry condition for redecoration, provided the appropriate paste has been used.
- A cost effective product. Excellent for tight budget projects.
- Matt finish.
- Protective varnish layer.

AQUA ACRYLIC SAND 37€/m2

Aqua Acrylic Sand wallpaper (185 grams/m2, with protective varnish) is a dimensionally stable non-woven 130 gr/m2 non-pvc substrate with a 50 gr/m2 top layer that gives the wallpaper surface a sandy matt texture effect. All wallpapers are coated with a water based varnish that will provide extra washability and scrub resistance. The coating will add an additional 4-6 grams to the top layer and is completely free of any heavy metals. The Aqua Acrylic top layer is an water based natural latex, a milky fluid produced by the rubber tree.

A list of attributes:

- 100% non-pvc substrate
- The surface is defined by its sandy textured top layer
- Noticeably stronger than standard wallpaper
- Washable surface
- Improved scrub resistance
- Dimensionally stable without stretching or shrinking
- Can be removed in dry conditions for redecoration, provided the appropriate paste has been used

AQUA ACRYLIC LINES 37€/m2

Aqua Acrylic Lines wallpaper is a dimensionally stable non-woven 130 gr/m2 non-pvc substrate with a 50gr/m2 top layer that gives the wallpaper surface a beautiful canvas matt texture effect. All wallpapers are coated with a water based varnish that will provide extra washability and scrub resistance. The coating will add an additional 4-6 grams to the top layer and is completely free of any heavy metals. The Aqua Acrylic top layer is an water based natural latex, a milky fluid produced by the rubber tree.

A list of great attributes:

- 100% non-pvc substrate
- The surface is defined by it's beautiful canvas textured top layer
- Noticeably stronger than standard wallpaper
- Washable surface
- Improved scrub resistance
- Dimensionally stable without stretching or shrinking
- Can be removed in dry conditions fro redecoration, provided the appropriate paste has been used

PEARL 37€/m2

Pearl wallpaper (150 grams/m2) is a dimensionally stable non-woven product with a sheen/iridescent finish. The base is made out of a fabric-like material made from long fibers, bonded together by a heat treatment. This process creates a mesh that bonds the wood fibers tightly together making the product extremely durable. Weco's pearl wallpaper substrate gives the printed colours a striking appearance, even creating a metallic effect.

A list of attributes:

- A lightweight and easy to handle product
- The surface is defined by a sheen/iridescent effect
- Noticeably stronger than standard wallpaper
- Dimensionally stable without stretching or shrinking
- Can be removed in a dry condition for redecoration, provided the appropriate paste has been used.

GOLD LINNEN 40€/m²

Gold linnen wallpaper (260 grams/m²) is a dimensionally stable high end non-woven product made with a gold metallic linnen textured top layer. The base is made out of a fabric like material made from long fibers, bonded together by a heat treatment. This process creates a mesh that bonds the wood fibers tightly together, making the product extremely durable. Printing designs over this substrate creates unimaginably beautiful and unique gold metallic wallpapers that can suitably be used for any industry but is specially made for the project market due to its durability and high end appeal.

A list of attributes:

- A heavy duty and high end product
- The surface is defined by its metallic gold effect
- Noticeably stronger than standard wallpaper
- Dimensionally stable without stretching or shrinking
- Can be removed in a dry condition for redecoration, provided the appropriate paste has been used.

SILVER SAND 40€/m²

Silver sand wallpaper (260 grams/m²) is a dimensionally stable high end non-woven product made with a silver metallic sand textured top layer. The base is made out of a fabric like material made from long fibers, bonded together by a heat treatment. This process creates a mesh that bonds the wood fibers tightly together making the product extremely durable. Printing designs over this substrate creates unimaginably beautiful and unique silver metallic wallpapers that can suitably be used for any industry but is specially made for the project market due to its durability and high end appeal.

A list of attributes:

- A heavy duty and high end product
- The surface is defined by its metallic silver effect
- Noticeably stronger than standard wallpaper
- Dimensionally stable without stretching or shrinking
- Can be removed in a dry condition for redecoration, provided the appropriate paste has been used.

COPPER LINNEN 40€/m2

Copper linnen wallpaper (260 grams/m2) is a dimensionally stable high end non-woven product made with a copper metallic linnen textured top layer. The base is made out of a fabric-like material made from long fibers, bonded together by a heat treatment. This process creates a mesh that bonds the wood fibers tightly together making the product extremely durable. Printing designs over this substrate creates unimaginably beautiful and unique copper metallic wallpapers that can suitably be used for any industry but is specially made for the project market due to its durability and high end appeal.

A list of attributes:

- A heavy duty and high end product
- The surface is defined by its metallic copper effect
- Noticeably stronger than standard wallpaper
- Dimensionally stable without stretching or shrinking
- Can be removed in a dry condition for redecoration, provided the appropriate paste has been used.
